

## **Health Professional Team**

### Prior to Children's Arrival

- Contact health professionals in the community to find those willing to donate basic medical exams, dental exams, vision and hearing screenings for the children (we can provide a list of previous professionals who provided services)
- Educate health professionals on the purpose and protocols of the summer program
- Try to arrange with the health professionals blocks of times, if possible, to do the children one after another.
- Provide the health professionals information and times availability to host families
- Follow up with host families to make sure they have scheduled their appointments for their host children

### During the Children's Stay

- Act as a liaison if necessary, between the host families and health professionals
